

# TIPSO AirPad<sup>®</sup>

Touchless Image Navigation

Innovative Control Interfaces  
for Sterile Operations

nZ technologies inc.  
*Taking touchless to a new dimension*

# TIPSO AirPad<sup>®</sup>

A handheld interface for bedside image navigation

## SYSTEM

### Designed for intraoperative use

Proprietary capacitive technology enables various modes of image navigation over the TIPSO AirPad surface (functioning as mouse and keyboard at bedside).

### Graphical Overlay

A real-time representation of the hand and menu is shown on the monitor display.

### Seamless Connectivity

USB dongle connects AirPad to any workstation wirelessly. System makes no connection to hospital network or transfer/storage of patient data for HIPAA compliance.

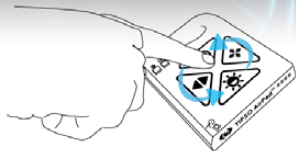

## FEATURES

- Handheld, portable, and wireless
- Operable inside a sterile cover
- Multimodally compatible with PACS, fluoro, conebeam CT and 3DRA
- Zero lag, responsive control

# COMPACT | WIRELESS | WORKHORSE

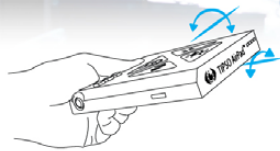

## CONTROLS

ZOOM

SCROLL

3D ROTATION

PAN

WINDOW/LEVEL

MEASUREMENT

SERIES CHANGE

SCREEN REGIONS

## BENEFITS

### Preserve Sterility

Operator no longer needs to leave the bedside and/or scrub out to interact with images.

### Improve Workflow

Faster operative time translates to quicker surgeries and lower costs.

### Maintain Operator Focus

On-demand control enables instantaneous review of patient's anatomy.

### Reduce Radiation Exposure

Access to patient images may reduce the need for additional scans.

## Regulatory

<b>FDA</b>	<b>Class 1;510(k) exempt</b>
<b>Health Canada</b>	<b>Not classified as medical device</b>
<b>QAI</b>	<b>60601-1 (UL equivalent)</b>
<b>CE Mark</b>	<b>Declared</b>
<b>KC (Korea)</b>	<b>Compliant</b>
<b>JRL (Japan)</b>	<b>Compliant</b>

## Technical

<b>Power Supply</b>	<b>Rechargeable battery / up to 7 hours life</b>
<b>Connectivity</b>	<b>Compatible with any imaging workstation (WIFI router and USB dongle provided)</b>
<b>Installation</b>	<b>No software or mechanical installation required</b>
